Savitribai Phule Pune University

RULES AND REGULATIONS

for

UG Choice Based Credit System for BA Programme

under the Faculty of Humanities

Effective from June 2019

Prof.(Dr.) Vijay Khare
Dean, Faculty of Humanities
Savitribai Phule Pune University (SPPU)

Background/Preamble:

Education plays an enormously significant role in the building of a nation. There are quite a large number of educational institutions, engaged in imparting education in our country. Majority of them have entered recently into semester system to match international educational pattern. However, our present education system is churning out youth who have to compete locally, regionally, nationally as well as globally. The present alarming situation necessitates transformation and/or redesigning of system, not only by introducing innovations but also developing learner-centric approach.

Majority of Indian higher education institutions have been following the system which obstructs the flexibility for the students to study the subjects/courses of their choice and their mobility to different institutions. There is need to allow the flexibility in education system, so that students depending upon their interests can choose inter-disciplinary, interdisciplinary and skill-based courses. This can only be possible when choice based credit system (CBCS), an internationally acknowledged system is adopted. The choice based credit system not only offers opportunities and avenues to learn core subjects but also explores additional avenues of learning beyond the core subjects for holistic development of an individual. The CBCS will undoubtedly facilitate benchmarking of our courses with best international academic practices.

Preface:

Considering the change in nature of higher education and input given by new education policy, SPPU has been implementing all Under-graduate programmes under the Faculty of Humanities from June 2019. As per the decisions by the authorities of Savitribai Phule Pune University, the Faculty of Humanities has prepared choice based credit system and its structure. The revised course is of 132 credits and 1 credit is equivalent to 15 hours. Assessment in credit system consists of:

- a) in-semester continuous assessment
- b) end-semester assessment for the oral/presentation at the end of the semester

The Faculty of Humanities has shouldered the idea of incorporating latest advances and equips the subjects /syllabus contents with latest and relevant topics and know-hows. Accordingly the new structure and syllabi are being introduced, to be implemented from the academic year 2019-20 from First Year and it will continue for subsequent years.

1. All UG programmes, under the Faculty of Humanities shall be offered with credit system.
2. All the BA programmes running under the Faculty of Humanities will be of three years duration.

3. The total no. of credits required for the completion of the programme is 132 credits.
4. One credit is equivalent to 15 hours.
5. A student is required to earn 132 credits in a minimum period of six semesters
6. The final CGPA will be calculated on the basis of 132 credits.
7. There is a 15 week of teacher-student interaction during the semester.
8. The 15 week is divided into 12 weeks teaching and 3 weeks for continuous assessment including preparation time to students during the semester (for theory course).
9. Advantages of the Choice based credit system:
10. Shift in focus from the teacher-centric to student-centric education.

1. Background/Preamble:

Education plays enormously significant role in building of a nation. There are quite a large number of educational institutions, engaged in imparting education in our country. Majority of them have entered recently into semester system to match with international educational pattern. However, our present education system is churning out youth who have to compete locally, regionally, nationally as well as globally. The present alarming situation necessitates transformation and/or redesigning of system, not only by introducing innovations but developing learner-centric approach.

Majority of Indian higher education institutions have been following the system which obstructs the flexibility for the students to study the subjects/courses of their choice and their mobility to different institutions. There is need to allow the flexibility in education system, so that students depending upon their interests can choose inter-disciplinary, intra-disciplinary and skill-based courses. This can only be possible when choice based credit system (CBCS), an internationally acknowledged system, is adopted. The choice based credit system not only offers opportunities and avenues to learn core subjects but also explore additional avenues of learning beyond the core subjects for holistic development of an individual. The CBCS will undoubtedly facilitate benchmarking of our courses with best international academic practices.

1.1 Preface

In a bid to fine tune our scientific education system to the global standards & practices, the Credit-Grade based performance and assessment system will be implemented with effect from June 2019 onwards for all the Under Graduate Programmes (UG) under the Faculty of Science, Savitribai Phule Pune University, Pune, starting with First Year.

With the advent of frontier science, technology and ever-changing expectations from the Industry and Society, it has become imperative to relook at the structure and subject contents of various UG courses to make it contemporary and relevant.

As per the decision by the authorities of Savitribai Phule Pune University, the faculty of Science has prepared the choice based credit system and its structure. The revised course is of 132 credits and 1 credit is equivalent to 15 hours. Assessments in credit system consist of A) In-semester continuous assessment and B) End-semester assessment for the Theory head and Term Work/ Practical / Oral / Presentation at the end of the semester for Practical, Oral, Seminar and Project Head.

The faculty of Science has shouldered the idea of incorporating latest advances in Science and technology and equip the subject/syllabus contents with latest and relevant topics and know-hows. Accordingly the new structure and syllabi are being introduced, to be implemented from the academic year 2019-20 from First Year and it will continue for subsequent years.

1. All UG programmes, under Faculty of Science shall be offered with credit system.
2. All the B.Sc. programmes running under the Faculty of Science will be of three years duration.
3. The total no. of credits required for the completion of the programme is 132 credits.
4. One credit is equivalent to 15 hours.
5. A student is required to earn 132 credits in a minimum period of six semesters.
6. There are eight mandatory credits to be earned by the students for the award of degree.
7. Final CGPA will be calculated on the basis of 132 credits.
8. There is 15 weeks of teacher-student interaction during the semester.
9. The 15 week is divided into 12 weeks teaching and 3 weeks for continuous assessment including preparation time to students during the semester.

10. The workload will be calculated on the basis of 12 weeks teaching only.

1.2 Advantages of the choice based credit system:

1. Shift in focus from the teacher-centric to student-centric education.
2. Student may undertake as many credits as they can cope with (without repeating all courses in a given semester if they fail in one/more courses).
3. CBCS allows students to choose inter-disciplinary, intra-disciplinary courses, skill oriented papers (even from other disciplines according to their learning needs, interests and aptitude) and more flexibility for students.
4. CBCS makes education broad-based and at par with global standards. One can take credits by combining unique combinations. For example, Physics with Economics, Microbiology with Chemistry or Environment Science etc.
5. CBCS offers flexibility for students to study at different times and at different institutions to complete one course (ease mobility of students). Credits earned at one institution can be transferred to another institution.

1.3 Implementation of UG course structure:

1. For First year: Student has to select 4 different subject among the subjects offered by the College /Institute.
2. For Second year: Student has to select 3 different subject among 4 subject chosen in first year
3. For Third year: Student has to select only 1 subject among the 3 subject opted in second year
4. CGPA will be calculated on the basis of core 132 credits only
5. Each theory credit is equivalent to 15 clock hours of teaching and each practical credit is equivalent to 30 clock hours of teaching in a semester.
6. There is 15 weeks of teacher-student interaction during the semester.
7. The 15 week is divided into 12 weeks teaching and 3 weeks for continuous assessment including preparation time to students during the semester.
8. The workload will be calculated on the basis of 12 weeks teaching only.
9. For the purpose of computation of work-load the following mechanism may be adopted as per UGC guidelines:
 - i) 1 Credit = 1 Theory period of one hour fifteen minute duration per week
 - ii) 1 Credit = 1 Tutorial period of one hour fifteen minute duration per week
 - iii) 1 Credit = 1 Practical period of two hour ten minute duration per week
10. Each theory Lecture time for FY,SY,TY is of 50 min. (3 Lectures per week for 2 credit course)
11. Each practical session time for FY is of 3 hour 15 minutes = 195 min
12. Each practical session time for SY & TY is of 4 hour 20 minutes = 260 min
13. Exam pattern: University assessment 70 % and continuous internal assessment 30 %.
14. For Internal examination minimum two tests per paper of which one has to be written test of 10 marks.
15. Methods of assessment for Internal exams: Seminars, Viva-voce, Projects, Surveys, Field visits, Tutorials, Assignment, Group Discussion.

2. UG Programme Structure:

2.1 Each B.Sc. programme is of 3 years duration. The minimum total no. of credits requirement for each programme is 132. In the structure, the credits are distributed over 6 semesters. The open elective included, gives the student a wide choice of subjects from other programmes. The Credit structure for B.Sc. programme is given below in Table 1.

1.3 Implementation of UG course structure

1. For first year: Student has to select 4 different subject among the subjects offered by the College Institute.
2. For second year: Student has to select 3 different subject among 4 subject chosen in first year.
3. For third year: Student has to select only 1 subject among the 3 subject opted in second year.
4. GPA will be calculated on the basis of only 132 credits only.
5. Each theory credit is equivalent to 15 clock hours of teaching and each practical credit is equivalent to 30 clock hours of teaching in a semester.
6. There is 15 weeks of teacher-student interaction during the semester.
7. The 15 week is divided into 12 weeks teaching and 3 weeks for continuous assessment including preparation time to students during the semester.
8. The workload will be calculated on the basis of 12 weeks teaching only.
9. For the purpose of comparison of workload the following mechanism may be adopted as per UGC guidelines:

2.3 Outlines of Choice Based Credit System [Detailed description of the courses]:

- a) **Core Course**(14 for honours courses; 4 discipline specific papers each for regular courses and 2 papers each for English and Hindi/MIL in B.A./B.Com): The papers under this category are going to be taught uniformly across all universities with 30% deviation proposed in the draft. The purpose of fixing core papers is to ensure that all the institutions follow a minimum common curriculum so that each institution/university adheres to common minimum standard. Also the course designed for papers under this category aim to cover the basics that a student is expected to imbibe in that particular discipline. A course, which should compulsorily be studied by a candidate as a core requirement is termed as a Core course.
- b) **Elective Course:** Generally a course which can be chosen from a pool of courses and which may be very specific or specialized or advanced or supportive to the discipline/subject of study or which provides an extended scope or which enables an exposure to some other discipline/subject/domain or nurtures the candidate's proficiency/skill is called an Elective Course.
- i. **Discipline Specific Elective (DSE) Course**(4 for honours courses and 2 each for regular courses): Elective courses offered under the main discipline/subject of study is referred to as Discipline Specific Elective. The list provided under this category are suggestive in nature and each University has complete freedom to suggest their own papers under this category based on their expertise, specialization, requirements, scope and need. The University/Institute may also offer discipline related Elective courses of interdisciplinary nature (to be offered by main discipline/subject of study).
 - ii. **Dissertation/Project*:** An elective course designed to acquire special/advanced knowledge, such as supplement study/support study to a project work, and a candidate studies such a course on his own with an advisory support by a teacher/faculty member is called dissertation/project.
 - iii. **Generic Elective (GE) Course**(4 for honours courses and 2 each for B.A./B.Com. regular courses): An elective course chosen from an unrelated discipline/subject, with an intention to seek exposure beyond discipline/s of choice is called a Generic Elective. The purpose of this category of papers is to offer the students the option to explore disciplines of interest beyond the choices they make in Core and Discipline Specific Elective papers. The list provided under this category are suggestive in nature and each University has complete freedom to suggest their own papers under this category based on their expertise, specialization, requirements, scope and need.
- P.S.: A core course offered in a discipline/subject may be treated as an elective by other discipline/subject and vice versa and such electives may also be referred to as Generic Elective.
- c) **Ability Enhancement Courses (AEC):** The Ability Enhancement (AE) Courses may be of two kinds: Ability Enhancement Compulsory Courses (AECC) and Skill Enhancement Courses (SEC). "AECC" courses are the courses based upon the content that leads to Knowledge enhancement; i. Environmental Science and ii. English/MIL(Marathi/Hindi) Communication. These are mandatory for all disciplines. SEC courses are value-based and/or skill-based and are aimed at providing hands-on-training, competencies, skills, etc.

- i. **Ability Enhancement Compulsory Courses (AECC):** Environmental Science, English Communication/Hindi Communication/MIL Communication.
- ii. **Skill Enhancement Courses (SEC)**(minimum 2 for honours courses and 4 for regular courses): These courses may be chosen from a pool of courses designed to provide value-based and/or skill-based knowledge and should contain both theory and lab/hands-on/training/field work. The main purpose of these courses is to provide students life-skills in hands-on mode so as to increase their employability. The list provided under this category are suggestive in nature and each University has complete freedom to suggest their own papers under this category based on their expertise, specialization, requirements, scope and need.

d) Practical/tutorials (One each with every core and discipline/generic specific elective paper): The list of practical provided is suggestive in nature and each university has the freedom to add/subtract/edit practical from the list depending on their faculty and infrastructure available. Addition will however be of similar nature.

e) Introducing Research Component in Under-Graduate Courses

Project work/Dissertation is considered as a special course involving application of knowledge in solving / analyzing /exploring a real life situation / difficult problem. A Project/Dissertation work would be of 6 credits. A Project/Dissertation work may be given in lieu of a discipline specific elective paper.

7. PERFORMANCE INDICES:

The semester end grade sheet will contain grades for the courses along with titles and SGPA. Final grade sheet and transcript shall contain CGPA.

7.1 Semester Grade Point Average (SGPA) -The performance of a student in a semester is indicated by a number called the Semester Grade Point Average (SGPA). The SGPA is the weighted average of the grade points obtained in all the courses, seminars and projects registered by the student during the semester.

$$SGPA = \frac{\sum_{i=1}^p C_i G_i}{\sum_{i=1}^p C_i}$$

$$SGPA = \frac{\sum \text{Grade Points Earned} \times \text{Credits for each course}}{\text{Total Credits}}$$

For Example: suppose in a given semester a student has registered for five courses having credits C1, C2, C3, C4, C5 and his / her grade points in those courses are G1, G2, G3, G4, G5 respectively.

Then students

$$SGPA = \frac{C_1 G_1 + C_2 G_2 + C_3 G_3 + C_4 G_4 + C_5 G_5}{C_1 + C_2 + C_3 + C_4 + C_5}$$

SGPA is calculated up to two decimal places by rounding off.

7.2 Course Grade Point Average (CGPA)- The CGPA is the weighted average of the grade points obtained in all the courses (Theory/term work/practical/oral/presentation) of first semester to sixth semester for the students admitted in the First year and third to sixth semester for the students directly admitted at Second year. It is calculated in the same manner as the SGPA.

In case of a student passing a failed course or in case of improvement, the earlier grade would be replaced by the new grade in calculation of the SGPA and CGPA.

8. RESULT:

Based on the performance of the student in the semester examinations, the Savitribai Phule Pune University will declare the results and issue the Semester Grade sheets.

The class shall be awarded to a student on the CGPA calculated as mentioned in Rule no. 6.1. The award of the class shall be as per Table 5. and corresponding percentage calculation for the CGPA is given in Table 6. along with all details and examples.

Table 5
CGPA distribution and corresponding class of the degree awarded

Sr. No	CGPA	Class of the Degree awarded
1	9.50 or More than 9.50	Outstanding (O)
2	8.50 or more but less than 9.50	Excellent (A+)
3	7.50 or more but less than 8.50	Very Good (A)
4	6.25 or more but less than 7.50	Good (B+)
5	5.25 or more but less than 6.25	Above Average (B)
6	4.75 or more but less than 5.25	Average (C)
7	4.00 or more but less than 4.75	Pass (D)

Table 6
Percentage calculation of a corresponding CGPA

For the calculation of Percentage from CGPA following equation can be used.

$$\% \text{ of Marks} = \left\{ \begin{array}{l} \text{if O grade then } 20 \times \text{CGPA} - 100 \\ \text{if A+ grade then } 10 \times \text{CGPA} - 5 \\ \text{if A grade then } 10 \times \text{CGPA} - 5 \\ \text{if B+ grade then } 12 \times \text{CGPA} - 20 \\ \text{if B grade then } 5 \times \text{CGPA} + 23.75 \\ \text{if C grade then } 10 \times \text{CGPA} - 2.50 \\ \text{if D grade then } 6.6 \times \text{CGPA} + 13.6 \end{array} \right\}$$

The factor considered in the above equations are evaluated from the grade point and marks distribution given in Table 3. The examples of the calculation of percentage are given in the Table 7.

Table 7
Some examples of CGPA to percentage calculations

Obtained CGPA	Equation	Percentage (%)	Grade
10	$20 \times 10 - 100 = 100$	100	O
9.75	$20 \times 9.75 - 100 = 95$	95	O
9.5	$20 \times 9.5 - 100 = 90$	90	O
9.0	$10 \times 9 - 5 = 85$	85	A+
8.0	$10 \times 8 - 5 = 75$	75	A
7.0	$12 \times 7 - 20 = 64$	64	B+
6.67	$12 \times 6.67 - 20 = 60.04$	60.04	B+
6.25	$12 \times 6.25 - 20 = 55$	55	B+
5.25	$5 \times 5.25 + 23.75 = 50$	50	B
4.75	$10 \times 4.75 - 2.50 = 45$	45	C
4.0	$6.6 \times 4.0 + 13.6 = 40$	40	D

While declaring the result, the existing relevant ordinances are applicable. There is also a provision for verification and revaluation. In case of verification, the existing rules will be applicable. The revaluation result will be adopted if there is a change of at least 10% marks and in the grade of the course.

For grade improvement a student will have to take minimum 30% of the requisite number of credits for the concerned degree. These courses will be theory courses from the parent department. Grade improvement programme will be implemented at the end of the academic year. A student can opt for the grade improvement programme only after the declaration of the result for his/her final semester exam, i.e., at the end of the next academic year after passing the final examination and within two years of completion of the degree and only once.

Pass (D)	4.50 or more but less than 4.75
Average (C)	4.25 or more but less than 4.50
Average (B)	4.00 or more but less than 4.25
Good (B+)	3.75 or more but less than 4.00
Very Good (A)	3.50 or more but less than 3.75
Excellent (A+)	3.25 or more but less than 3.50

Table 6
Percentage calculation of a corresponding CGPA
For the calculation of Percentage from CGPA following equation can be used

$$\% \text{ of Mark} = \left(\begin{array}{l} \text{If B grade then } 68 \times \text{CGPA} + 12.8 \\ \text{If C grade then } 58 \times \text{CGPA} + 12.8 \\ \text{If D grade then } 48 \times \text{CGPA} + 12.8 \\ \text{If E grade then } 38 \times \text{CGPA} + 12.8 \\ \text{If F grade then } 28 \times \text{CGPA} + 12.8 \\ \text{If G grade then } 18 \times \text{CGPA} + 12.8 \\ \text{If O grade then } 8 \times \text{CGPA} + 12.8 \end{array} \right) \times 100$$

The table considered in the above question we evolved from the grade point and marks distribution given in Table 1. The example of the calculation of percentage are given in the Table 7.

Credit and Semester system (CSS)
Implementation of Credit and Semester System at PG level
(w e f 2019-20)

1- The post-graduate degree will be awarded to students who obtain a total credit as follows

Sr.No	Name of the Faculty	Total credits	Average credits per semester
1	Faculty of Humanities	64	16

2- One credit will be equivalent to 15 clock hours of teacher-student contact per semester. There will be no mid-way change allowed from CSS to non-credit (external) system or vice versa.

3- Among the total number of credits required to be completed for degree course (64 credits) students have to opt for minimum 75% credits from parent Department and remaining 25 % can be opted from either parent Department or other Department/Centers/Faculty. In addition to that students have to obtain compulsory credits over and above.

Examination Rules

1- Assessment shall consist of a) In-semester continuous assessment and b) end semester assessment. Both shall have an equal weightage of 50 % each.

2- The teacher concerned shall announce the units for which each in-semester assessment will take place. However, the end-semester assessment shall cover the entire syllabus prescribed for the course.

3- An in-semester assessment of 50% marks should be continuous and at least two tests should be conducted for full course of 4 credits and a teacher must select a variety of procedures for examination such as:

- i. Written Test and/or Mid Term Test (not more than one or two for each course)
- ii. Term Paper;
- iii. Journal/Lecture/Library notes;
- iv. Seminar presentation;
- v. Short Quizzes;
- vi. Assignments;
- vii. Extension Work;
- viii. An Open Book Test (with the concerned teacher deciding what

books are to be allowed for this purpose)

or

ix. Mini Research Project by individual student or group of students

The concerned teacher in consultation with the Head of the PG Department shall decide the nature of questions for the Unit Test.

4- Semester end examination for remaining 50% marks will be conducted by the SPPU.

5- The student has to obtain 40 % marks in the combined examination of in Semester assessment and Semester-End assessment with a minimum passing of 30 % in both these separately.

6- To pass the degree course, a student shall have to get minimum aggregate 40% marks (E and above on grade point scale) in each course.

7- If a student misses an internal assessment examination he/she will have a second chance with the permission of the Principal in consultation with the concerned teacher. Such a second chance shall not be the right of the student.

8- Internal marks will not change. A student cannot repeat Internal Assessment. In case she/he wants to repeat internal assessment she/he can do so only by registering for the said courses during the 5th / 6th semester and onwards up to 8th semester.

9- Students who have failed semester-end exam may reappear for the semester end examination only twice in subsequent period. The student will be finally declared as failed if she\he does not pass in all credits within a total period of four years. After that, such students will have to seek fresh admission as per the admission rules prevailing at that time.

10- A student cannot register for the third semester, if she/he fails to complete 50% credits of the total credits expected to be ordinarily completed within two semesters.

11- There shall be Revaluation of the answer scripts of Semester-End examination but not of internal assessment papers as per Ordinance no.134 A & B.

12- While marks will be given for all examinations, they will be converted into grades. The semester end grade sheets will have only grades and final grade sheets and transcripts shall have grade points average and total percentage of marks (up to two decimal points). The final grade sheet will also indicate the PG Centre to which the candidate belongs.

Assessment and Grade point average

1- The system of evaluation will be as follows: Each assignment/test will be evaluated in terms of grades. The grades for separate assignments and the final (semester-end) examination will be added together and then converted into a grade and later a grade point average. Results will be declared for each semester and the final examination will give total grades and grade point average.

3	Semester III	16
4	Semester IV	16
	Grand Total	64

Four extra credits for project work at 4th Semester (This will include credits for fieldwork, data presentation and report writing)

In each Semester, there will be four papers of 100 marks each out of which **40 marks will be for Internal Assessment** (attendance, home assignments, class tests, long term papers, classroom presentation and **60 marks for University Examination**. Thus M.Com. degree examination, four Semesters shall be of 1600 marks.

In addition to the above, students are required to secure following ten credits. These credits are compulsory in nature.

All other successful candidates shall be declared to have passed in second class. Candidates who obtain 70% of the marks in the aggregate (INTERNAL ASSESSMENT +UNIVERSITY EXAMINATION) shall be deemed to have passed the examination in first class with distinction.

A student who passes in all the courses will be declared to have passed the M.Com. degree with the following honors.

CGPA in (4.00, 4.99)	- Pass Class
CGPA in (5.00, 5.49)	- Second Class
CGPA in (5.50, 5.99)	- Higher Second Class
CGPA in (6.00, 7.99)	- First Class
CGPA in (8.00, 10.00)	- First Class with Distinction

11. Scheme of Credits:

Sixty (60) hours of teaching will lead to four credits (which mean four hours per week teaching in one semester) and long term paper as well as presentation will carry one credit. Each semester shall offer 16 credits or more.

12. Grade Points Scheme:

The term grading system indicates a 10 – points scale of evaluation of the performance of students in terms of marks obtained in the Internal and External Examination, grade points and letter grade. The total performance within a semester and continuous performance starting from the first semester are indicated respectively by Grade Point

Average (GPA) and Cumulative Grade Point Average (CGPA). Candidates who pass all the examinations prescribed for the course in the first appearance itself alone are eligible for Ranking.

The 10-point scale would be used to convert marks out of 100 to grades and grade points according to the following table:

Marks as Percentage	Grade	Grade Point
[75.0, 100]	O	10.0
[70.0, 74.9]	A+	9.0
[65.0, 69.9]	A	8.0
[60.0, 64.9]	B+	7.0
[55.0, 59.9]	B	6.0
[50.0, 54.9]	C+	5.5
[45.0, 49.9]	C	5.0
[40.0, 44.9]	D	4.5
[00.0, 39.9]	F	0.0

The above formula computes to the following table:

Range in % of Marks	Range of CGRADE POINT AVERAGE	Letter Grade	Division
[75.0, 100]	[9.00, 10.00]	O	First Class with Distinction
[70.0, 74.9]	[8.00, 8.99]	A+	
[65.0, 67.9]	[7.00, 7.99]	A	First Class
[60.0, 64.9]	[6.00,6.99]	B+	
[55.0, 59.9]	[5.50, 5.99]	B	Higher Second Class
[50.0, 54.9]	[5.00,5.49]	C+	Second Class
[45.0, 49.9]	[4.50, 4.99]	C	Pass Class
[40.0, 44.9]	[4.00, 4.49]	D	
[00.0, 39.9]	[0.00, 3.99]	F	Fail

Thus the percentage of Marks can be obtained by using the following table:

CGRADE POINT AVERAGE	% of Marks	CGRADE POINT AVERAGE	% of Marks	CGRADE POINT AVERAGE	% of Marks	CGRADE POINT AVERAGE	% of Marks
4.0	40.0	5.5	55.0	7.0	65.0	8.5	72.5

4. Evaluation Pattern:

Examination Rules

- 4.1 A student cannot appear for semester end examination unless he/she has maintained 75% attendance during the teaching period of that course. If a student fails to maintain attendance up to 75%, at the time of filling of examination forms, an undertaking from the student should be taken stating that he/she will be allowed to appear for examination subject to fulfillment of required attendance criteria during the remaining period of teaching of the course.
 - 4.2 Each course carrying 100 marks shall be evaluated with Continuous Assessment (CA) and University Evaluation (UE) mechanism.
 - 4.3 Continuous assessment shall be of 30 marks (30%) while University Evaluation shall be of 70 marks (70%). To pass in a course, a student has to secure minimum 40 marks (40%) provided that he should secure minimum 28 marks (40%) in University Evaluation (UE) and 12 marks (40%) in continuous assessment.
 - 4.4 Each credit will have an internal (continuous) assessment of 30% of marks and a teacher must select a variety of procedures for examination such as:
 - a) Written Test and/or Mid Term Test (not more than one for each course)
 - b) Term Paper;
 - c) Viva-voce,
 - d) Projects / Surveys / Field visits,
 - e) Tutorials,
 - f) Group Discussion
 - g) Journal/Lecture/Library notes;
 - h) Seminar presentation;
 - i) Short Quizzes;
 - j) Assignments;
 - k) Extension Work;
 - l) Research Project by individual students or group of students; or
 - m) An Open Book Test (with the concerned teacher deciding what books are to be allowed for this purpose.)etc (on approval of the head of the centre)
 - 4.5 If a student misses an internal assessment examination, he/she will have a second chance with the permission of the teacher concerned. Such a second chance shall not be the right of the student; it will be the discretion of the teacher concerned to give or not to give second chance to a student to appear for internal assessment.
 - 4.6 Students who have failed semester-end exam may reappear for the semester-end exam in the subsequent period. The student will be finally declared as failed if he/she does not pass in all credits within a total period of four years in case of two year courses and five years in case of three year courses. After that, such students will have to seek fresh admission as per the admission rules prevailing at that time.
 - 4.7 Internal marks will not change. A student cannot repeat internal assessment. In case he/she wants to reappear for the internal assessment he/she can do so only by registering for the said courses during the semesters in which the courses are being conducted.
- 4.8 There shall be revaluation of the answer scripts of semester-end examination of theory papers only but not of internal assessment papers as per Ordinance no 134 A and B.
 - 4.9 While marks will be given for all examinations, they will be converted into grades. The semester end and final grade sheets and transcripts will have only grades and grade points average.
 - 4.10 Except for the technology faculty, in subjects or departments where project work is part of the credits, the project will consist of not more than ten percent of the total credits for the degree course.

5. ATKT Rules:

- 5.1 Minimum number of credits required to take admission to Second Year: 20 [50% of total credit in first year]
- 5.2 A student cannot register for the third semester, if he/she fails to complete 50% credits of the total credits expected to be ordinarily completed within two semesters. In this case, a student can seek admission to first or second semester in order to complete the requisite number of credits and to be able to seek admission in the third semester.

6. Completion of Degree Course:

- 6.1 A student, who earns 80 credits, shall be considered to have completed the requirements of the M. Sc. degree program and CGPA will be calculated for such student.
- 6.2 The following percentage to grade and grade point is given in Table-3 and respected example of CGPA calculated is given in Table-4.

Table - 3
Percentage to Grades and Grade Points

Sr. No.	Grade Letter	Grade Point	Marks
1	O (Outstanding)	10	90 ≤ Marks ≤ 100
2	A+ (Excellent)	9	75 ≤ Marks ≤ 89
3	A (Very Good)	8	60 ≤ Marks ≤ 74
4	B+ (Good)	7	55 ≤ Marks ≤ 59
5	B (Above Average)	6	50 ≤ Marks ≤ 54
6	C (Average)	5	45 ≤ Marks ≤ 49
7	D (Pass)	4	40 ≤ Marks ≤ 44
8	F (Fail)	0	Marks < 40
9	Ab (Absent)	0	

7. PERFORMANCE INDICES:

The semester end grade sheet will contain grades for the courses along with titles and SGPA. Final grade sheet and transcript shall contain CGPA.

- 7.1 **Semester Grade Point Average (SGPA)** -The performance of a student in a semester is indicated by a number called the Semester Grade Point Average (SGPA). The SGPA is the weighted average of the grade points obtained in all the courses, seminars and projects registered by the student during the semester.

$$SGPA = \frac{\sum_{i=1}^p C_i G_i}{\sum_{i=1}^p C_i}$$

$$SGPA = \frac{\sum \text{Grade Points Earned} \times \text{Credits for each course}}{\text{Total Credits}}$$

For Example: suppose in a given semester a student has registered for five courses having credits C₁, C₂, C₃, C₄, C₅ and his / her grade points in those courses are G₁, G₂, G₃, G₄, G₅ respectively.

Then students

$$SGPA = \frac{C_1 G_1 + C_2 G_2 + C_3 G_3 + C_4 G_4 + C_5 G_5}{C_1 + C_2 + C_3 + C_4 + C_5}$$

SGPA is calculated up to two decimal places by rounding off.

a. Food Processing Technology

UGC Sponsored B. Voc Programme

1. Preamble

The Government of India to meet the goal of empowering the youth and also to make education relevant and creating 'industry fit' skilled work force, initiated the B. Voc. programs. Based upon the guidelines for B. Voc. courses issued by AICTE, UGC and also the guidelines of B. Voc. programs in colleges in NSQF (Academic council sub-committee report of SPPU, June 2019) the Board of studies has prepared the admission rules, regulations and syllabus structure common for the programs.

2. Objectives

- To provide judicious mix of skills relating to a profession and appropriate content of general education.
- To ensure that the students have adequate knowledge and skills so that they are work ready at each exit point of the program.
- To provide flexibility to the students by means of pre-defined entry and exit points.
- To integrate NSQF within the UG level of higher education in order to enhance employability of the graduates and meet industry requirements. Such graduates apart from meeting the needs of local and national industry are also expected to be equipped to become part of the global workforce.
- To provide vertical mobility to students coming out of 10+2 vocational subjects.
- Global mobility of skilled work force from India through international equivalence of NSQF.

The focus is to formulate courses as per the regional skill gap as per the need of

- i. Industry in specialized areas
- ii. Design curriculum and contents in the areas of skill development.
- iii. Pedagogy, assessment for skills development education and training.
- iv. Trained faculty to deliver in the areas of skill development and
- v. Entrepreneurship development.

3. Duration of the B. Voc. Programs: 3 years [Six semesters].

4. Eligibility for Admission to the B. Voc. Programs

- i. Type A - Students who have already acquired NSQF certification level 4 in a particular trade and opted

EXPLAIN HOW TO HIS COY MISTRESS DEALS WITH LOVE AND DEATH

BY
 Miss. Wagh Rani shahaji

UNDER THE GUIDANCE OF
 Ms. S. S. KENDALE

Explain how 'To His coy mistress' deals with love and death?

Introduction.

Andrew marvell is one of the metaphysical poets. He is a great love poet and To his coy mistress is a fine love poem by him.

Andrew marvell is one of the most endearing poets of the metaphysical school of poetry. Love religion and nature are the major themes of his poetry. His love poems are graceful. To his coy mistress' is the best-known poem is a fine love poem. The following study of the poem will reveal the validity of these points.

To	i] Lover's Request to his mistress

mistress	iv] As a metaphysical poem.

① Lover's Request to his mistress
 The poet to his lover Request his coy mistress to accept his love. But the beloved has a sense of honour. so she feels nervous. Her sense of honor has made her coy. But the lover is

very eager to make his beloved accept his love. In order to tempt her, he explains to her that they are mortal and so love each other, otherwise they will have to repent to their satisfied love. While explaining the fact, the poet speaks about time, and therefore, the poem has Time theme as well.

ii] The Lovers Have Less Time.

The lover explains to his coy mistress that her coyness would not be her crime. If they had much time, then she would be searching tubies on the bank of the Ganga in India. The lover would be complaining about love the banks of the river the Humber in England. He would have stated his love before the Great flood, the beginning of the world. she would refuse till the Judgement Day, the supposed day on which the whole world will end. similarly, the poet would have spent thousands of years in praising her beauty.

iii] The Lovers must Love

As time is limited, lover and should love. The lover says that time is riding in its winged chariot. It is very fast. Time will eat them soon. This means that they will die soon. The lover remarks that the beloved has has colour of youth according to him. though she rejects him love, her soul is willing, so they should love like the mating birds, otherwise, the time monsters will devour them. They would die and then regret for their unsatisfied passion. The lovers can

not stop the cycle of time. But they can make him run faster. The fact means that the lovers should make use of the present time and should not wait for future. The lover once more requests his beloved to accept his love as they are mortal. Thus, the poem deals with the themes of Love and Time.

iv] As a metaphysical poem.

use of conceits and wit The poem is a fine example of metaphysical poetry. It is remarkable for its wit and conceits. the poet is able to continue and fuse wit into imagination. The images like the vegetable love, the conversion of Jews etc are striking. The conceits of Time and chariot of Time are noteworthy.

thus the above discussion shows that the poem is a fine love poem and a typical metaphysical poem. The poem has classical theme and well-knit structure.

Assignment No. 1

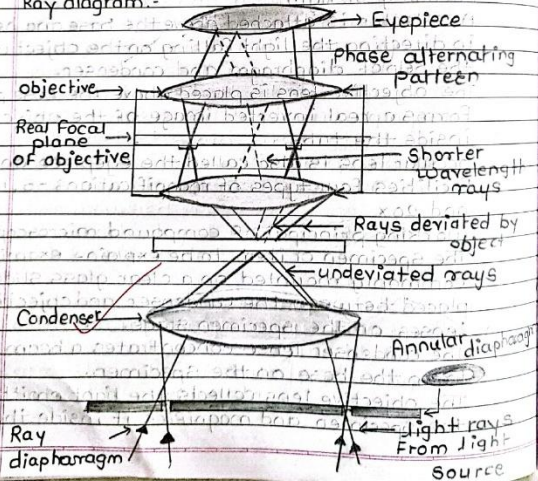

- 1) Explain the different parts of compound microscope with its principal of working and ray diagram.
- A compound microscope with a high-resolution microscope that uses two sets of lenses to provide a 2-dimensional image of the object. There are 5 optical parts of compound microscope. The diaphragm controls the amount of light falling on the object. It is present below the stage.
- The condenser of the compound microscope is located below the diaphragm and facilitates the focusing of light. A reflector is attached above the base and helps in directing the light falling on the object with the help of diaphragm and condenser. The objective lens is placed above the nose piece, forms a real inverted image of the object inside the tube.
- ocular lens is also called the eyepiece and facilitates four types of magnifications - 5, 10, 15, and 20x.
- Working principle of compound microscope :-
The specimen or item to be examined is commonly mounted on a clear glass slide and placed between the condenser and objective lenses on the specimen stage.
- The condenser lens concentrates a beam light from the base on the specimen.
- The objective lens collects the light emitted by the specimen and magnifies it inside the body

tube to form a primary image. The ocular lens or eyepiece enlarges this image once more.

When a higher magnification is necessary, the nose piece of compound microscope is turned after low power focusing to align. It was sometime necessary to use extremely high magnification. An oil immersion objective lens is used in this situation.

As the image is created inside a brightly lighted field, the common light microscope is also known as bright-field microscope.

- 2) What is differential staining techniques. Write acid fast differential staining.
- differential staining procedure involve more than one stain and differential organisms based on the stain that they retain. The two most important differential stains used are gram stain and acid-fast stain.
- Acid fast staining :- some bacteria are surrounded by a membrane composed of fatty or waxy substances. Therefore, these organisms are not easily stained by simple stain. Once stained they can retain the colour even after treatment with strong decolourising agent like concentrated acid. These organisms are said to be fast because the stained bacteria are resistance to decolourization with acid alcohol mixture (decolourizing agent).
- Acid-fast stain, first introduced by Dr. Paul Ehrlich also known as the Ziehl-Neelson's staining. It is named for two German doctors who modified it.
- The bacteriologist Franz Ziehl and the pathologist Friedrich Neelson.
- Principle :- The cells of Mycobacteria contain extra ordinary high about 60% lipid content (mycolic acids and waxes) in their cell wall are extremely difficult to stain by normal method like gram stain.

The phenolic compound Ziehl-Neelson's carbol fuchsin (mixture of triethyl dyes, resorcin and pararosaniline in aqueous 5% phenol) is used as the primary stain because it is lipid soluble and penetrates the waxy cell wall. Staining by carbol fuchsin is further enhanced by steam heating the preparation to melt the wax and allow the stain to move into the cell.

Acid alcohol mixture is used to decolorize non-acid fast cells resist this decolorization with acid confers acid-fastness to the bacterium.

Procedure :-

Make a thin smear of the material for study and heat fix by passing the slide 3-4 times through the flame of bunsen burner or use a slide warmer at 65°C - 75°C. Do not over heat. Place the slide on staining rack and pour ZNCF (Ziehl-Neelson's Carbol Fuchsin) over smear and heat gently underside of the slide by passing a flame under the rack until flames.

Rinse smears with water until no colour appears in the effluent pour decolourise (20% sulphuric acid + 95% ethanol) wait for one minute and keep on repeating this stops until the slide appears light pink in colour (15-20 sec). Wash well with clean water.

2) Write down difference between Gram positive or Gram Negative staining.

characteristics	Gram + cells	Gram - cells
Magnesium ribonucleote	Present	Absent
Sensitivity to triphenyl methane dyes	Highly sensitive	Less sensitive
resistant to alkali	Not dissolved	Sensitive
Peptidoglycan	50-90%	Nearly 10%
Lipid content	4-8%	11-25%
Isoelectric PH range	2.5-4	4.4-5.5

3) Explain Loeffler's method for flagellar staining.

→ Flagella of a bacterial cell are very thin, hair like structure. This delicate structure can easily get destroyed. So there is no heat fixation step.

It is very important to increase the thickness of flagella so that we can stain it and observe it under microscope.

In this staining technique, Loeffler's mordant contains tonic acid and ferric chloride with alcohol.

After application of this mordant and heating it alcohol get evaporated and the colloidal particles get adhere to the flagella

and increases its thickness.

Further this smear is treated with Loeffler stain containing basic fuchsin, it precipitates on flagella and thus stain the flagella as well as cell in pink colour.

Procedure:

- 1) Clean the slides by boiling them in chromic acid solution.
- 2) Preparation of smear:
 - a) Take a slant of flagellated cell culture
 - b) Add 2 drops of sterile distilled water
 - c) Incubate for 20 minutes.
 - d) Take a drop of culture suspension and place on slide kept in slanting position.
 - e) Air dry the smear.
- 3) Wash the slide gently with distilled water.
- 4) Treat the smear with Loeffler's stain and heat it in steam.
- 5) Wash the slide with distilled water, air dry and observe under oil immersion lens.
- 6) Bacterial cells stain dark pink and flagella appears faint pink.

A brief account of Indian thought

Indian Geography has a long history in fact, various geographical concepts have been developing in our country since the dawn of Indian civilization. Though a systematic account of the classical Indian Geographical concepts is not available in a book form, yet some valuable Geographical information is contained in Hindu mythology, Philosophy, epics, history and sacred laws chronologically, the Vaidikas, the Ramayana, the Mahabharata, the works of Buddhist and Jains, and the Puranas are the main source of ancient Indian geographical concept.

The ancient Indian scholars had accurate knowledge of topography, Physiography, Flora, Fauna, natural resources, agriculture and other socio-economic activities of India and adjoining countries. The term 'Bhogeol' has ancient been first used in 'Suryasiddhanta'. The ancient Indian Geography hinges on religion and mythology. Every physical phenomenon, every major or spectacular landmark on the earth's surface has a religious background for Indians every Mountain Peak, river, crag, huge and useful tree is sacred and is preserved in these traditions. The work done by Varahmihir, Brahmagupta,

Aryabhata, Bhaskaracharya, Bhattila, utPala, Vijayanandi and others has substantially helped the development of astronomy, mathematical geography and cartography. Suryasiddhant is one of the earliest doctrine or traditions in astronomy. It describes the archo-astronomy theories, Principles and methods of the ancient Hindus. citation of Suryasiddhanta is also found in the work of Aryabhata. In Padmapuranas a difference has been made between Bhogeol (Geography), Khagol (the science of space and Jotishkra (Astrology).

- ① **Varahmihir (505-587 AD)**
 - ① Varahmihir was an Indian Astronomer, mathematician and astrologer who lived in Ujjain.
 - ② He was born in Avanti region of Madhya Pradesh.
 - ③ He was considered to be one of the nine jewels (Navratna) of the court of legendary ruler Yashodharman Vikramaditya of Malwa.
 - ④ He contributed significantly in the field of astronomy and mathematical geography.
 - ⑤ He also described the causes of solar and Lunar eclipses and their impact on human society.

- ② **Brahmagupta (597-668 AD)**
 - ① Brahmagupta was an Indian mathematician, Astronomer.
 - ② He wrote two important works on mathem.

atics and Astronomy, namely the Brahmasphut- asiddhant (extensive Treatise of Brhma- 628) theoretical treatise and the Khandokhadyka a more practical text.

- ③ **Brahmagupta was the first to give rules to compute with zero.**
- ③ **Bhaskara / Baskaracharya (1114-1185 AD)**
 - ① Baskaracharya was an Indian mathematician, Astronomer.
 - ② He was born near Bijapur Karnataka.
 - ③ Baskaracharya is a head of Astrological observatory at Ujjain, Ujjain is leading mathematical centre of India.
 - ④ He lived in Jalgaon district of Maharashtra.
 - ⑤ His main work Siddhant shiromani, consists of four parts that deal with arithmetic, algebra, mathematics and planets and spheres.
 - ⑥ He is particularly known for the discovery of the principle of differential calculus and its application to astronomical problems and computations.
 - ⑦ He was perhaps the first to conceive the differential coefficient and differential calculus.

- ④ **Aryabhata (476-550 AD)**

- 1 Aryabhata was a great mathematician, Astronomer and geographer of the classical Indian period
- 2 His work includes the 'Arybhattiya' and 'Arya Siddhanta' deals with mathematics and Astronomy.
- 3 'Arybhattiya' is extensively referred to in the Indian mathematical literature and has survived even in modern times. The mathematical part of the 'Arybhattiya' covers arithmetic, algebra, plane, trigonometry and spherical geometry. It also contains continued fractions, quadratic equations, sums of power series and table sines.
- 4 He used letters of alphabets to denote numbers, expressing quantities. Knowledge of zero was implicit in Arybhata's place value system as a place holder for the power of ten with null coefficient.
- 5 Aryabhata gives the area of a triangle by stating 'For a triangle, the result of a perpendicular with the half side is the area.'
- 6 He also discussed the concept of sine in his work by the name ardhya-jya which means 'half-cord'.
- 7 He believed that the planets orbits are elliptical rather than circular.
- 8 According to Aryabhata the order of planets in term of distance from the earth is moon, me-

- cury, venus, sun, mars, Jupiter, saturn, and asteroids.
- 9 He states that the moon and planets shine by reflected sunlight.
- 10 solar and lunar eclipses were scientifically explained by Aryabhata.

Instead of prevailing cosmology in which eclipses were caused by pseudo planetary demons Rahu, and Ketu, he and falling on earth. These will only occur when the Earth-Moon orbital plane, at points call lunar nodes thus, the lunar or eclipse occurs when the moon enters into earth's shadow.

* The universe and its origin *

The ancient Indian scholars of the vedic and puranic periods gave considerable thought to origin of universe. The ancient Indian literature deals with many problems pertaining to cosmology and cosmography. The cosmology of the Vedas which has a strong bearing on the vedas which has a strong bearing on the Puranic views may be summarized, as: 1. Artistic origin of the universe, 2. Mechanical origin of the universe, 3. Instrumental origin of the universe 4. Philosophical origin of the universe

1 Artistic origin of the

universe - The Rigveda mentions a number of gods who performed various functions during the process of creation. These were artists who contributed their skill to the construction and completion of the universe. The universe was compared to a house and Rigveda alludes to various stages in the construction of this universal house.

2 Mechanical origin the universe -

The views regarding the mechanical origin of the universe developed in the last phase of Rigveda period. It suggests the sacrifice of the primeval body known as adi-purusa who is conceived as soul and the nucleus of the universe and an embodiment of the supreme spirit. The sky, the wind, the moon, the sun, all the terrestrial elements were the result of dismemberment of purusa as a result of sacrifice ceremony.

3 Instrumental origin of universe -

The instrumental origin of universe is based on the occurrence of parent bodies from which the universe was created. Agni (Fire), Indra, soma, Surya (Sun), Rudra and the other gods are mentioned as having been instrumental in the creation of the earth and the heaven-the twin.

4 Philosophical origin of the universe

The philosophical theory of cosmology had its origin in the song of creation which says that in the beginning there was neither being (sat) or not-being (a sat).

There was no atmosphere, no sky, no days and no nights. The space was born by its inherent heat. This heat has been explained by Wilson as austerities, but it may conveniently be considered as a physical action in the process of formation of the universe.

The universe has been described as Brahmand in the ancient Indian literature.

In the epics and puranas, universe was divided into seven upper and seven internal divisions.

origin of the earth. It has been mentioned in the upnishadas that in the beginning death conceived all. Water was produced after withership death, from which the earth was originated. According to puranas, there
